PERFORATED PANELS

www.perfonet.co.uk

Made in Germany

Give your home an individual touch

Our materials

PERFONET® perforated panels are manufactured using a special process and customized for use in your project. The lacquer used is water-based and can be finished with any other paint if required.

Our perforated MDF panels conform to the low formaldehyde level E1, Class A. Our timber products are from sustainable and managed forests. All our timber products are FSC®-certified.

Finishes

>> white faced

>> unfinished

>> oak veneer
